

Local/State	
	Local Conservation Districts are also a great resource!
	Local Fire Safety Councils
	Watershed interest groups -- great example from New Mexico. How can we expand this reduction of litigation to forest thinning when that will be better for the watershed?
	Association of State Floodplain Managers at national level and state chapters are focusing more on post-fire issues and being more proactive of managing floodplains to minimize these impacts.
FALN/FAC/Firewise	
	Is Burned Area Learning Network part of or tied to the Fire learning Network?
	Does Burned Area Learning Network have a blog or webpage or place to share this information for learning exchange?
	Our Long Term Recovery Group is a member of Fire Adapted Communities and it is proving to be a very efficient partnership!
	Firewise communities Are a great way to share
Engaging	
	Are these networks working together?

Anne: Yes, Burned Area Learning Network is part of the TNC, DOI, USDA led Fire Learning Network.

Our current information is housed on the Conservation Gateway here : <http://www.conservationgateway.org/ConservationPractices/FireLandscapes/FireLearningNetwork/RegionalNetworks/Pages/BALN.aspx>. In the next few months (Late summer- fall 2020) we'll be setting up a homepage with this and additional information on the TNC New Mexico website www.nature.org/newmexico

Cara: The Burned Area Learning Network (BALN) is currently hosted by the Nature Conservancy (<https://www.conservationgateway.org/ConservationPractices/FireLandscapes/FireLearningNetwork/RegionalNetworks/Pages/BALN.aspx>). In addition to the BALN network page, there are several regional fire science exchange networks sponsored by the Joint Fire Science Program (<https://www.firescience.gov>) These networks all share science through emails, webinars, and blogs.

Anne: This webinar is a great example of how networks are working together

	How can we get involved in some of these networks?	There are several efforts that are expanding and coordinating efforts. For work in the Southwest you can contact Anne Bradley abradley@tnc.org . See the latest postings on the After the Flames website. For more community based interaction with peers see the Fire Adapted Communities Learning Network https://fireadaptednetwork.org/
		Cara: One of the easiest ways to get involved in the networks is to sign up for the email newsletters in addition to attending webinars and events hosted by the networks. Many of the leadership teams of these networks contain representatives from all sectors of government, academia and non-governmental organizations.
	Would assume many Universities are engaged in research - not sure if they are engaged with existing networks mentioned.	
	Practitioners and stakeholders added to discussions	
Feds		
	Army Corps of Engineers and Silver Jackets "roadmaps" or "toolkits"	
	Planning - early engagement with BAER folks et al to help discussions of how landscapes may react to a fire	
Funding		
	Comment: connection of Troy's slide, fed, non-fed lands and funding sources - the NM RMRS GTR-315 suggestion: connect to state hazard mitigation plan and local HMP to connect to FEMA grant programs	
	funding	
Indeed it is		
	intense effort
