2

## AIM GRANT

CCOCO offers a unique wildfire mitigation funding opportunity for a wide variety of capacity-building activities, including personnel, planning and wildfire risk reduction work on non-federal land.

## COMMUNITY WILDFIRE MITIGATION BEST PRACTICES TRAINING

The CWMBP national-level training is designed for current or future mitigation specialists, wildfire program leads and others who work with residents and their communities, to become more efficient and effective at reducing wildfire risk.

## COLDFIRE SEQUESTRATION

Coldfire is a group of mycology researchers investigating the use of native fungi to heal and improve our forests with the forest ecology itself. Fungal-produced composts have been scientifically proven to hold twice as much carbon. This could provide an opportunity in which to increase our carbon stores naturally and safely.

## RIVERBANK

A revolving loan fund that provides bridge funding for project implementation for conservation collaboratives. Funding is designed to increase the efficiency and impact of existing investments.

## COMMUNITY MITIGATION ASSISTANCE TEAM

The CMAT works closely with Incident Management Teams, the U.S. Forest Service or other land management agencies, and community residents and leaders to identify mitigation opportunities before fire impacts the community.

**CO-CO.ORG**

2432 S. Downing St. Suite 101  
Denver, Colorado 80210  
719-412-3747

## MITIGATION MENTORS

The Mitigation Mentors Program (MMP) provides one-on-one mentorship to increase wildfire mitigation, increase organizational capacity, improve community resilience and support wildland fire adaptation.

## AFTER THE FLAMES

A series of webinars and biannual conferences providing tools and tactics for communities and agencies impacted by wildfire.

## After the Flames

brought to you by Coalitions & Collaboratives, Inc.

*Tools and tactics for communities and agencies impacted by wildfire.*

## Save the Date

April 15-17, 2024

YMCA of the Rockies, Estes Park, Colorado

[co-co.org](http://co-co.org) | [aftertheflames.com](http://aftertheflames.com)

# Using Mentimeter

- Scan the QR code or enter menti.com into your computer's web browser
- Enter the code given in the QR box or info bar above
- Follow along and participate in the webinar

# Discussions, Polling, Q&A,

- Polling is anonymous. Please be respectful and professional.
- Please reserve GoToWebinar's 'Question' box for technical issues.
- Please note we will try to address all questions and comments in the webinar recording.

## We ask that you please...

- take care of yourself
- practice confident humility – the self-awareness that we all have wisdom and we will always have more to learn
- consider listening if you talk often (if you often listen quietly, consider speaking up)
- listen actively and with an ear to understanding others' views
- speak your truth using "I" statements
- avoid assumptions
- commit to learning, not debating
- embrace paradox

**COLORADO**

Colorado Water  
Conservation Board

Department of Natural Resources

# Wildfire Ready Watersheds

## Healthy Forested Watersheds:

- Maintain flow regimes at historic conditions
- Are able to resist, absorb, and recover from natural hazards (Resilience)
- Provide high quality water supply for agriculture, municipal, and environment
- Provide diverse and complex habitat features in upland and riverine environments

# Wildfire Ready Watersheds

**Ecological resilience** is “the capacity of an **ecosystem** to absorb repeated disturbances or shocks and adapt to change without fundamentally switching to an alternative stable state” (Holling, 1973).

# Wildfire Ready Watersheds

## MISSION

The CWCB will assess the susceptibility of Colorado's water resources, communities and critical infrastructure to post-wildfire impacts and advance a framework for communities to plan and implement mitigation strategies to minimize these impacts – before wildfires occur.

Legislative directive from SB21-240

## VALUES AT RISK

### Values at Risk Data Sets

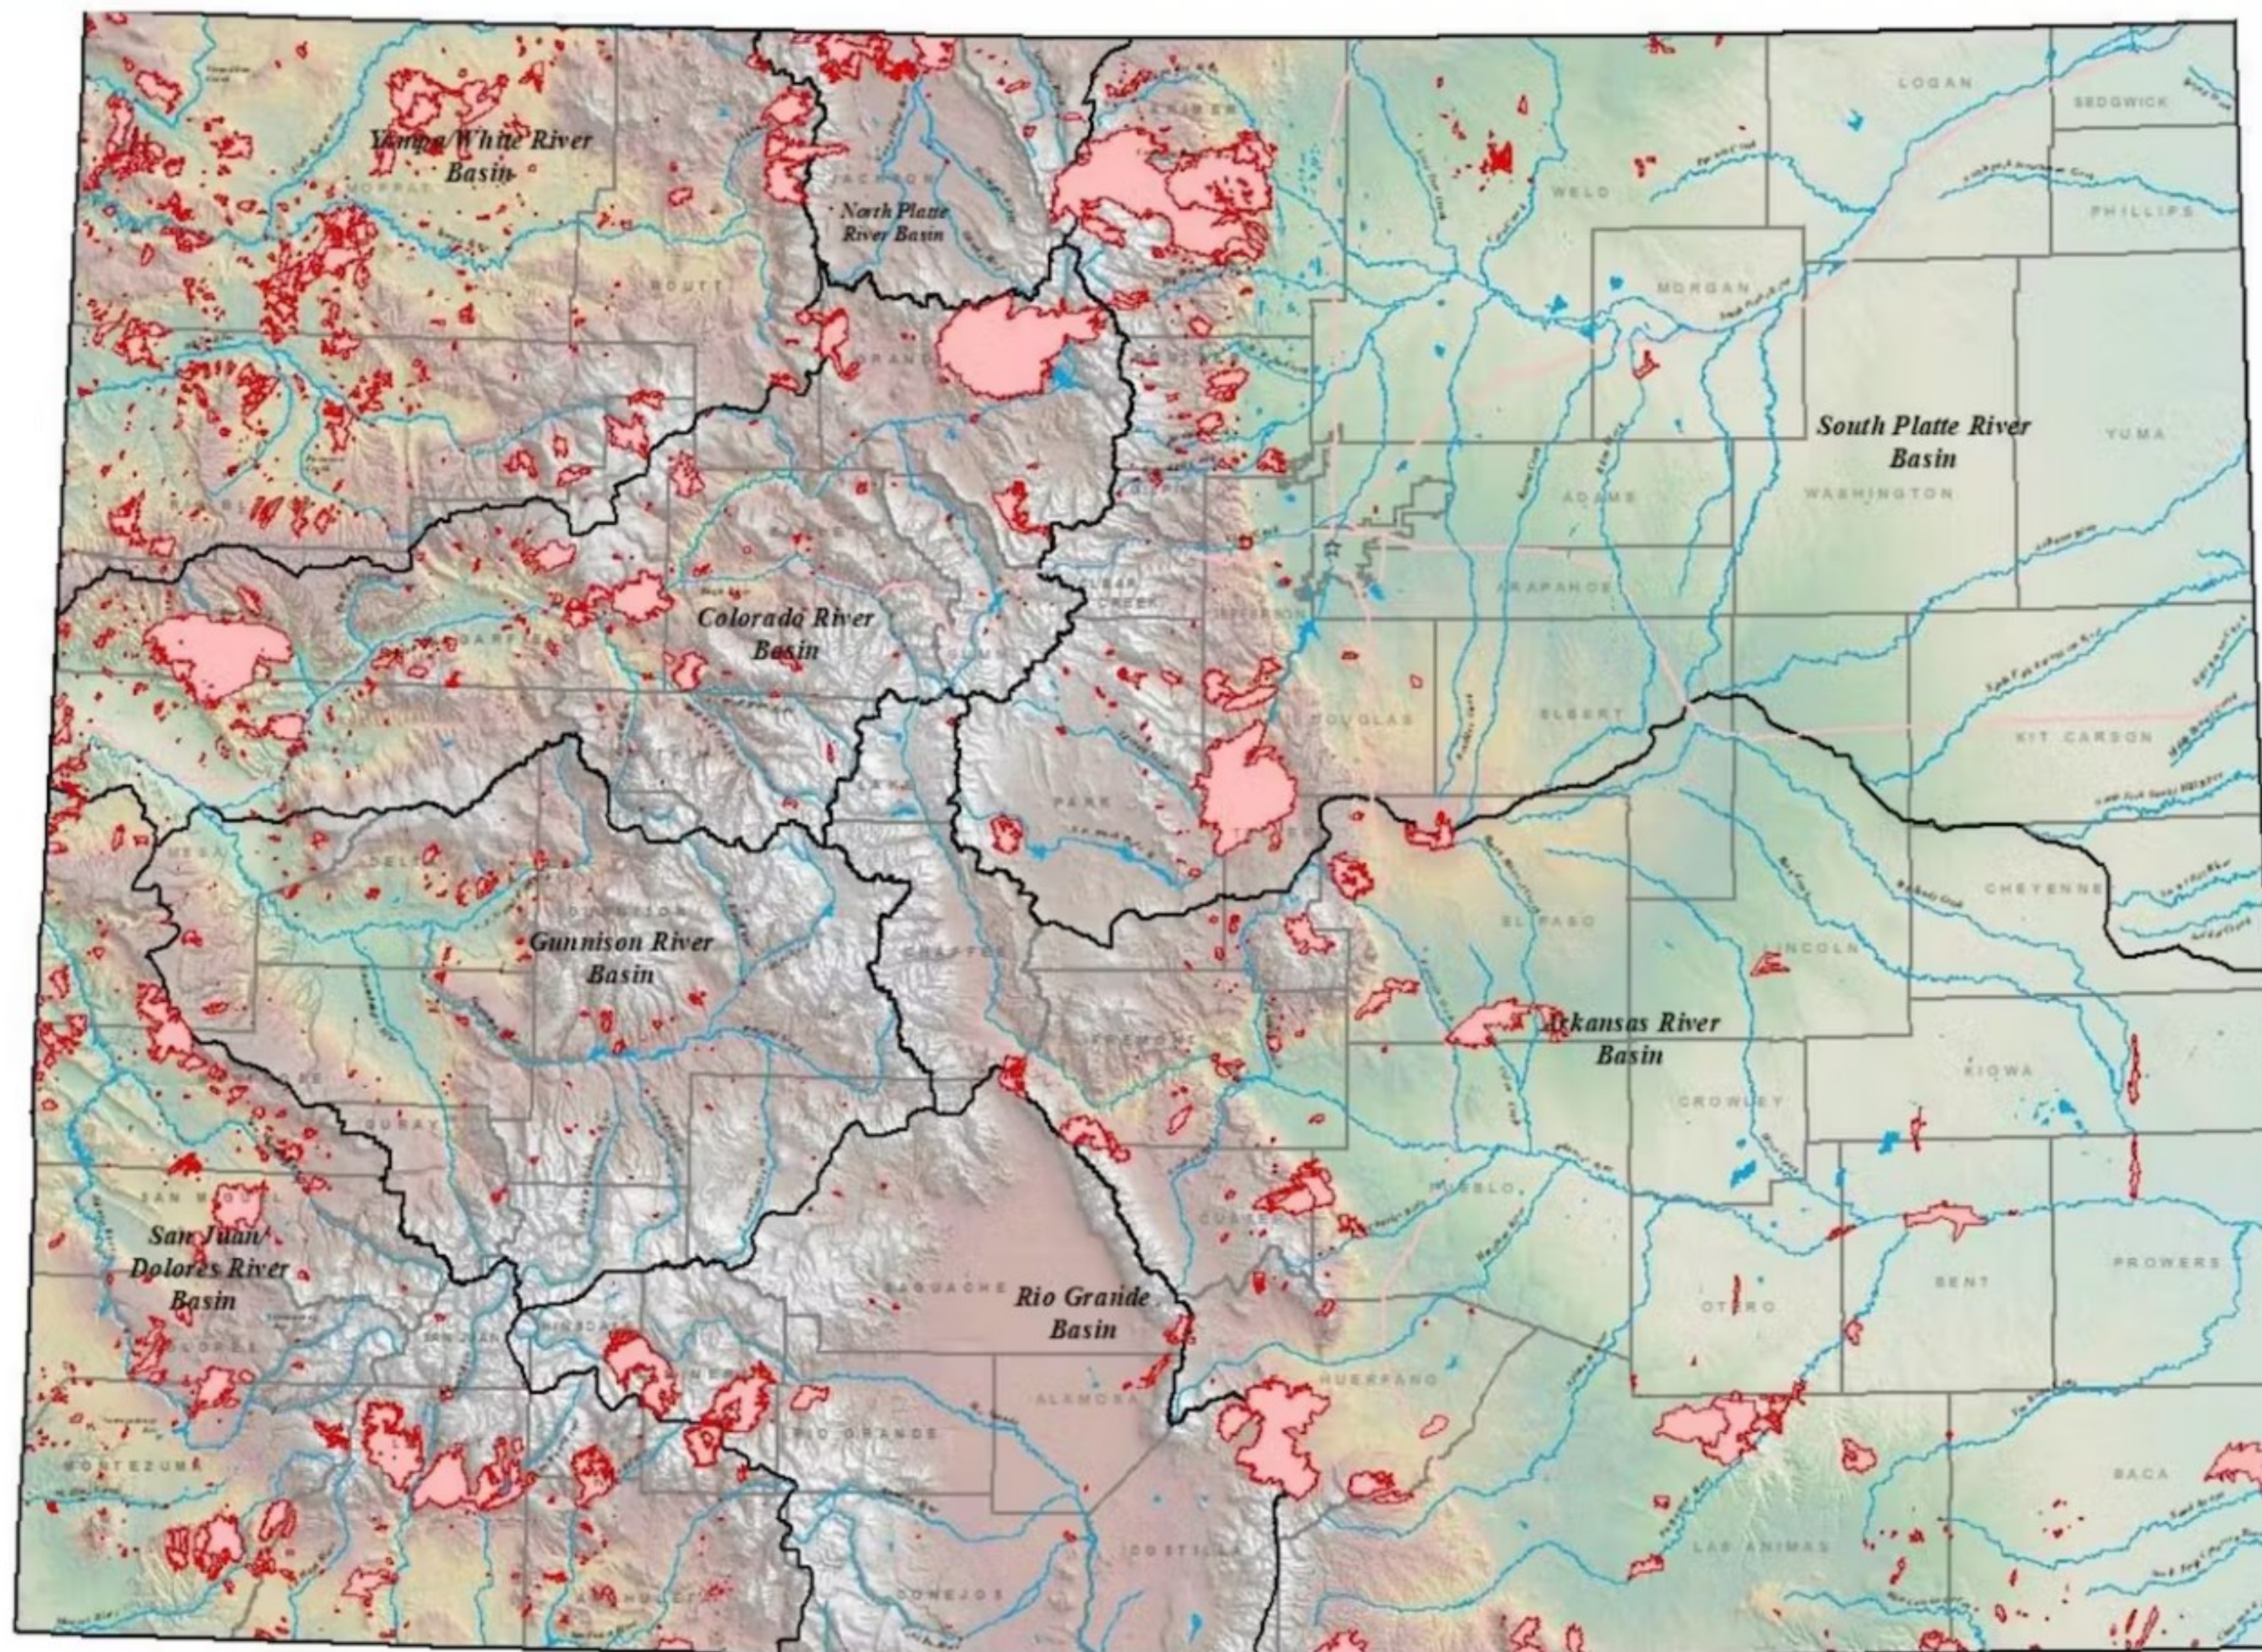

- These data sets represent the presence and number of assets within any given watershed (HUC12).
- Many of the watersheds (HUC12) shown are not at risk for wildfires that would generate high burn severity resulting in significant post-fire hazards.
- The asset layers form the foundation for the intersection with post-fire hazards.

- 26 - 31
- 32 - 36
- 37 - 42
- 43 - 48
- 49 - 54
- 55 - 60

Numeric values above represent progressively increasing relative (measured by watershed comparison) susceptibility of Values-at-Risk to Post-Fire Hazards. The values shown represent the average of all analyzed values each calculated on a per HUC12 basis. Basins with no estimated risk are shown as blank/empty. The maximum possible value of 100 would represent the highest presence of Values-at-Risk and the highest likelihood of Post-Fire Hazard occurrence.

Produces a watershed-by-watershed assessment of local post-fire hazard risk against Values-at-Risk (VAR).

# Statewide Post-Fire Susceptibility Explorer

## Explore Your Susceptibility

The Wildfire Ready Watersheds (WRW) program seeks to assess the susceptibility of Colorado's watersheds to post-fire hazard risk in order to support development of pre-fire and post-fire mitigation plans, preparing communities and stakeholders for these impacts - before fires occur.

This web map provides an overview of the susceptibility mapping and associated analyses and evaluations performed to assess statewide susceptibility to post-fire hazards at a watershed (HUC-12) scale. This analysis was completed in three steps.

- 1. Values-at-Risk (VAR) Identification.** This work curated available asset data classes at a statewide level and summarizes the relative presence of assets within any given HUC-12 watershed.
- 2. Hazard Analysis.** Hazard analyses were collected or performed at a watershed scale for hydrologic change, post-fire flooding, sediment/hillslope erosion, and debris flow probability.
- 3. Risk Assessment.** The risk assessment represents the intersection of VARs with hazards (risk = probability x consequence).

### Susceptibility Mapping Information

STATEWIDE SUSCEPTIBILITY MAPPING -DRAFT

# FRAMEWORK

## What is a framework?

A comprehensive guide for local watershed advocacy groups and agencies that can be followed to produce local-level post-fire susceptibility evaluations on a watershed scale to direct pre-fire and post-fire mitigation actions.

**#wildfireactionplan101**

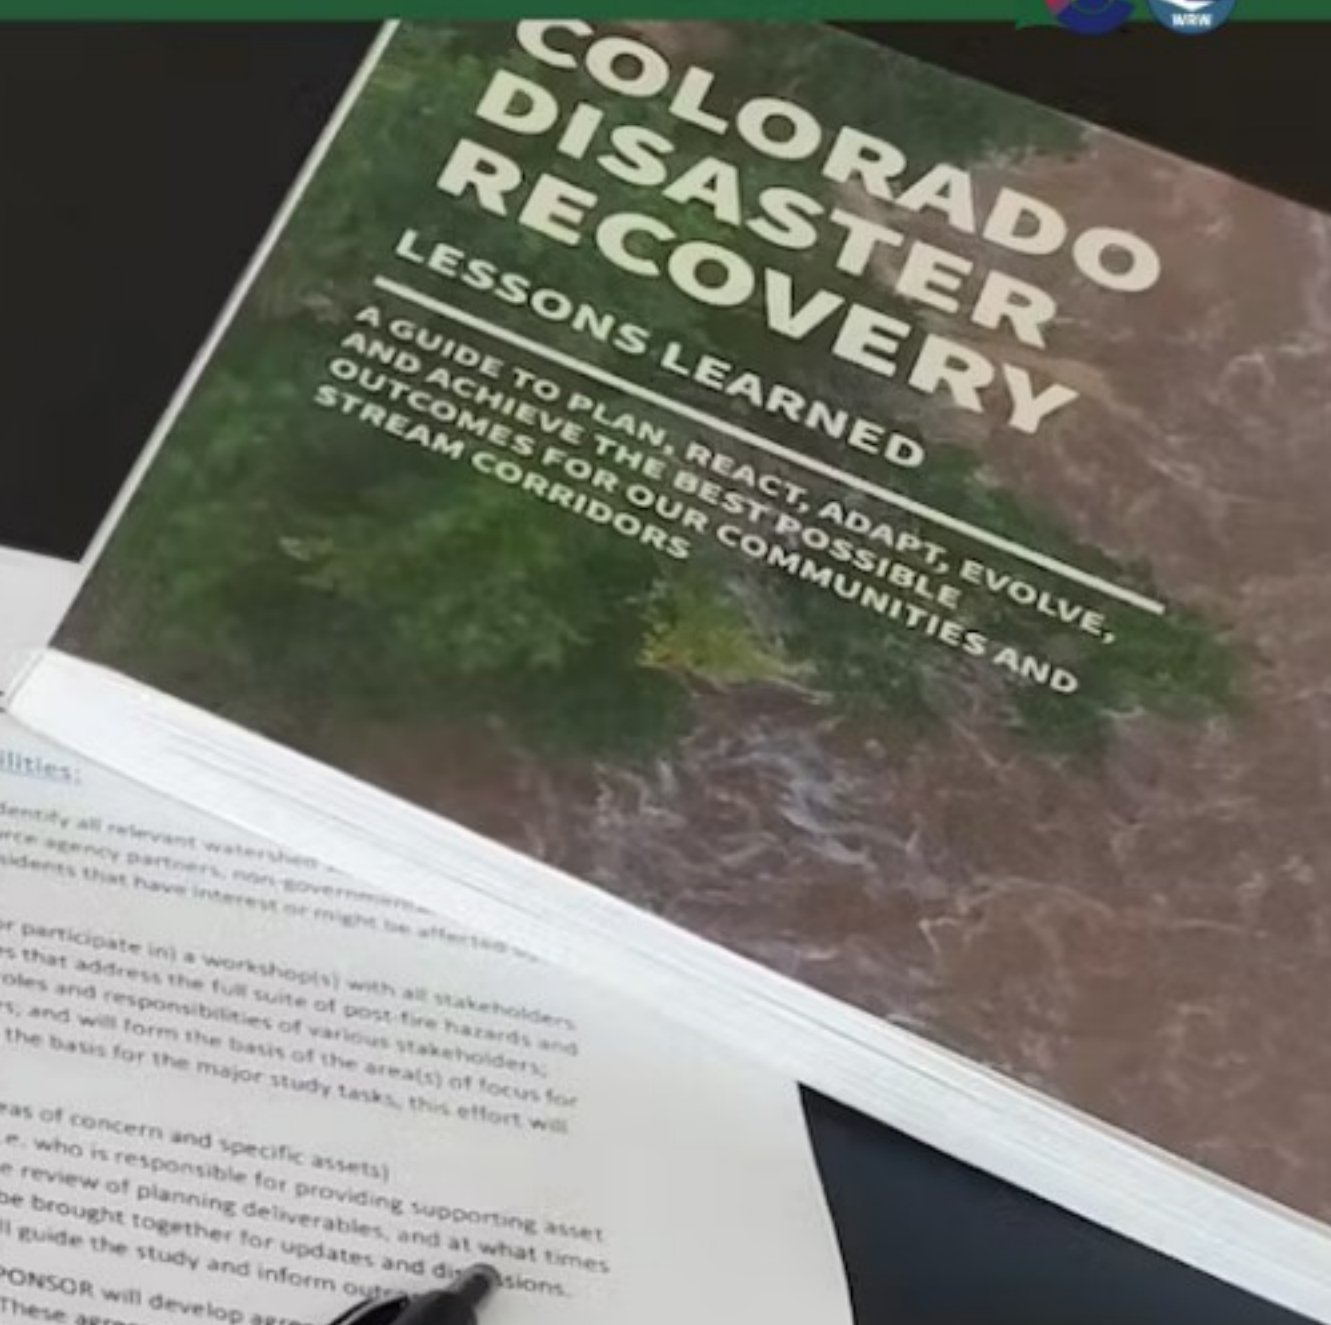

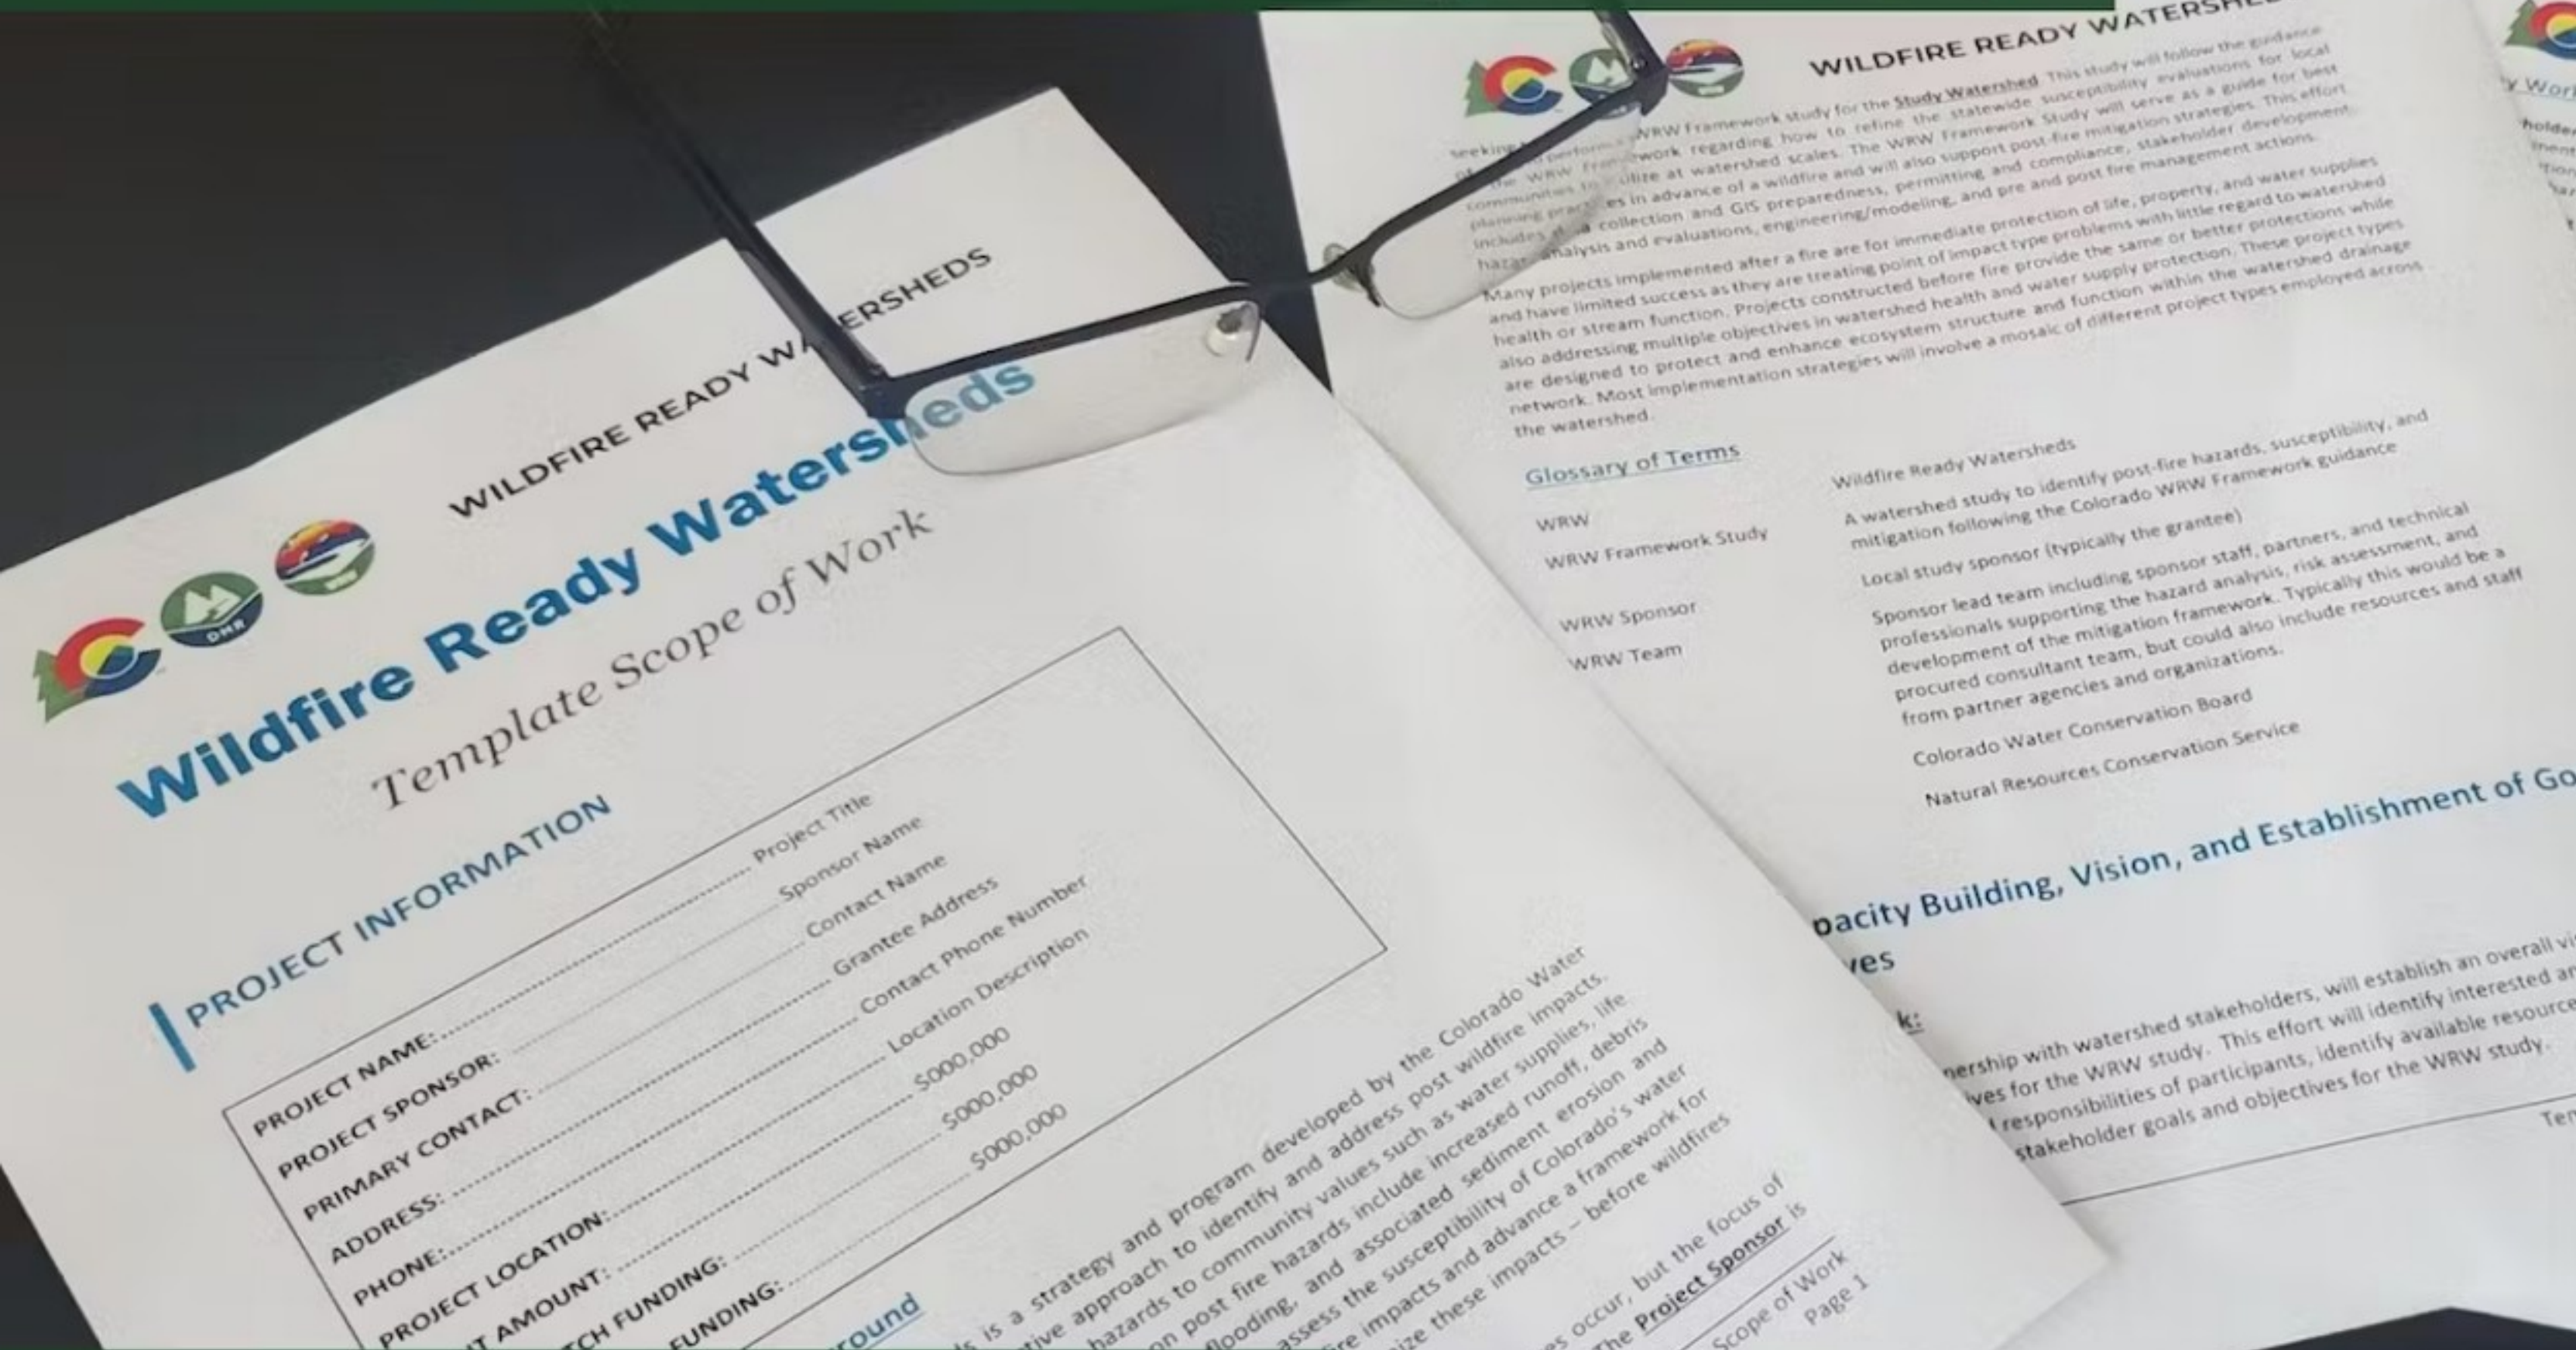

# Wildfire Ready Watersheds

## FRAMEWORK, aka Wildfire Ready Action Plan (WRAP)

## SCOPE OF WORK

Develop a framework for local communities and stakeholders that they can implement to further refine their susceptibility evaluations and determine both pre and post wildfire mitigation strategies to reduce risk to life, property and infrastructure.

# Wildfire Ready Watersheds

## FRAMEWORK

### Fact Sheets:

- Hydrology/Hydraulics/Flood After Fire
- Debris/Mud Flow
- Fluvial Hazard Zone
- GIS Preparedness
- Stakeholder Outreach and Communication
- Hillslope Erosion
- Water Quality
- Municipal Water Supply

## FACT SHEETS

# FRAMEWORK

## Task 1: Capacity Building, Vision, and Establishment of Goals and Objectives

- Identify partners and stakeholders
- Develop overall vision for the WRW Framework Study
- Establish study goals and objectives
- Develop and execute agreements with partners

## FRAMEWORK

### Task 2: Stakeholder Collaboration, Community Outreach, and Public Meetings

- Regular communication with stakeholders
- Community outreach activities
- Workshops including project prioritization and mitigation funding
- Website creation and maintenance

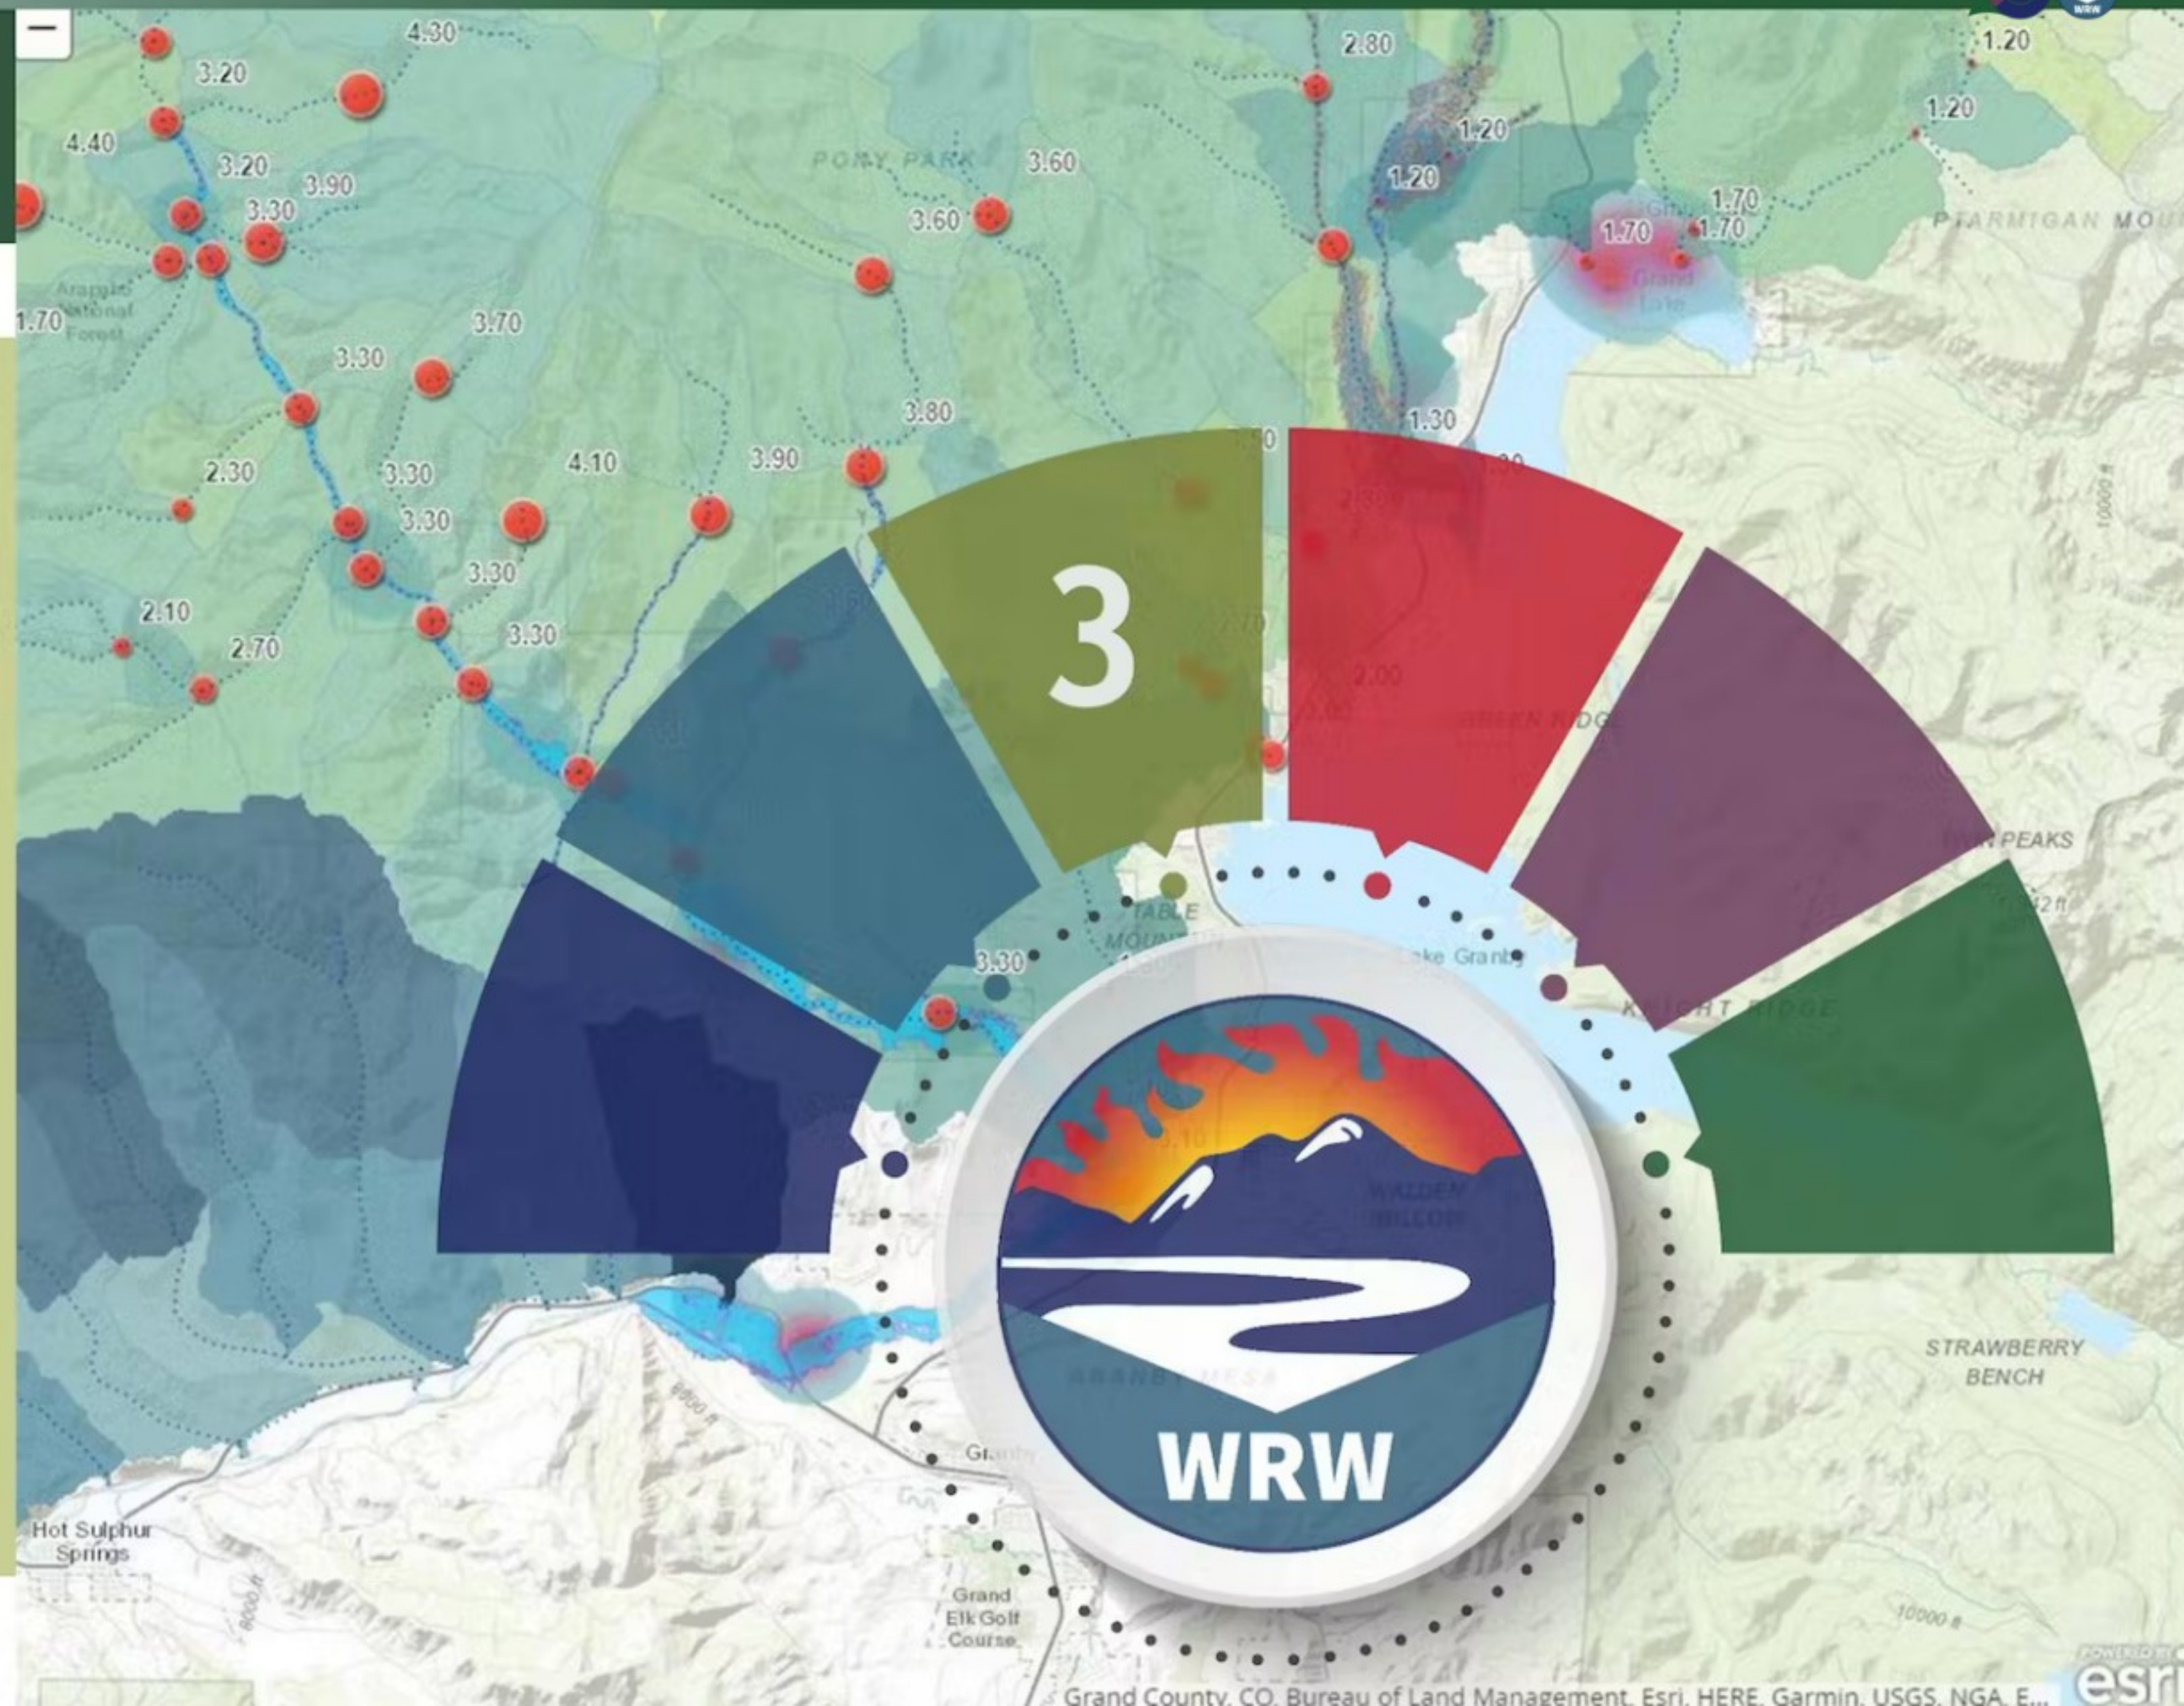

# Wildfire Ready Watersheds

## FRAMEWORK

### Task 3: Data Collection, Research, Review, and Gap Analysis

- GIS data collection for values at risk, hazards, and supporting information
- Previous study and research review
- Infrastructure operations
- Data gap analysis (what's missing for the best possible outcome?)

# FRAMEWORK

## Task 4: Post Fire Hazard Analysis

- Analyses and evaluations to identify hazards for:
  - Hydrologic response
  - Floods after fire
  - Fluvial hazard zones
  - Debris flows
  - Hillslope and gully erosion
  - Water quality

## FRAMEWORK

### Task 5: Susceptibility Analysis

- Identification of Values-at-Risk using hazard overlay
- Determining consequences of post-fire hazards
- Developing a prioritization based on severity of consequences of post-fire impacts and

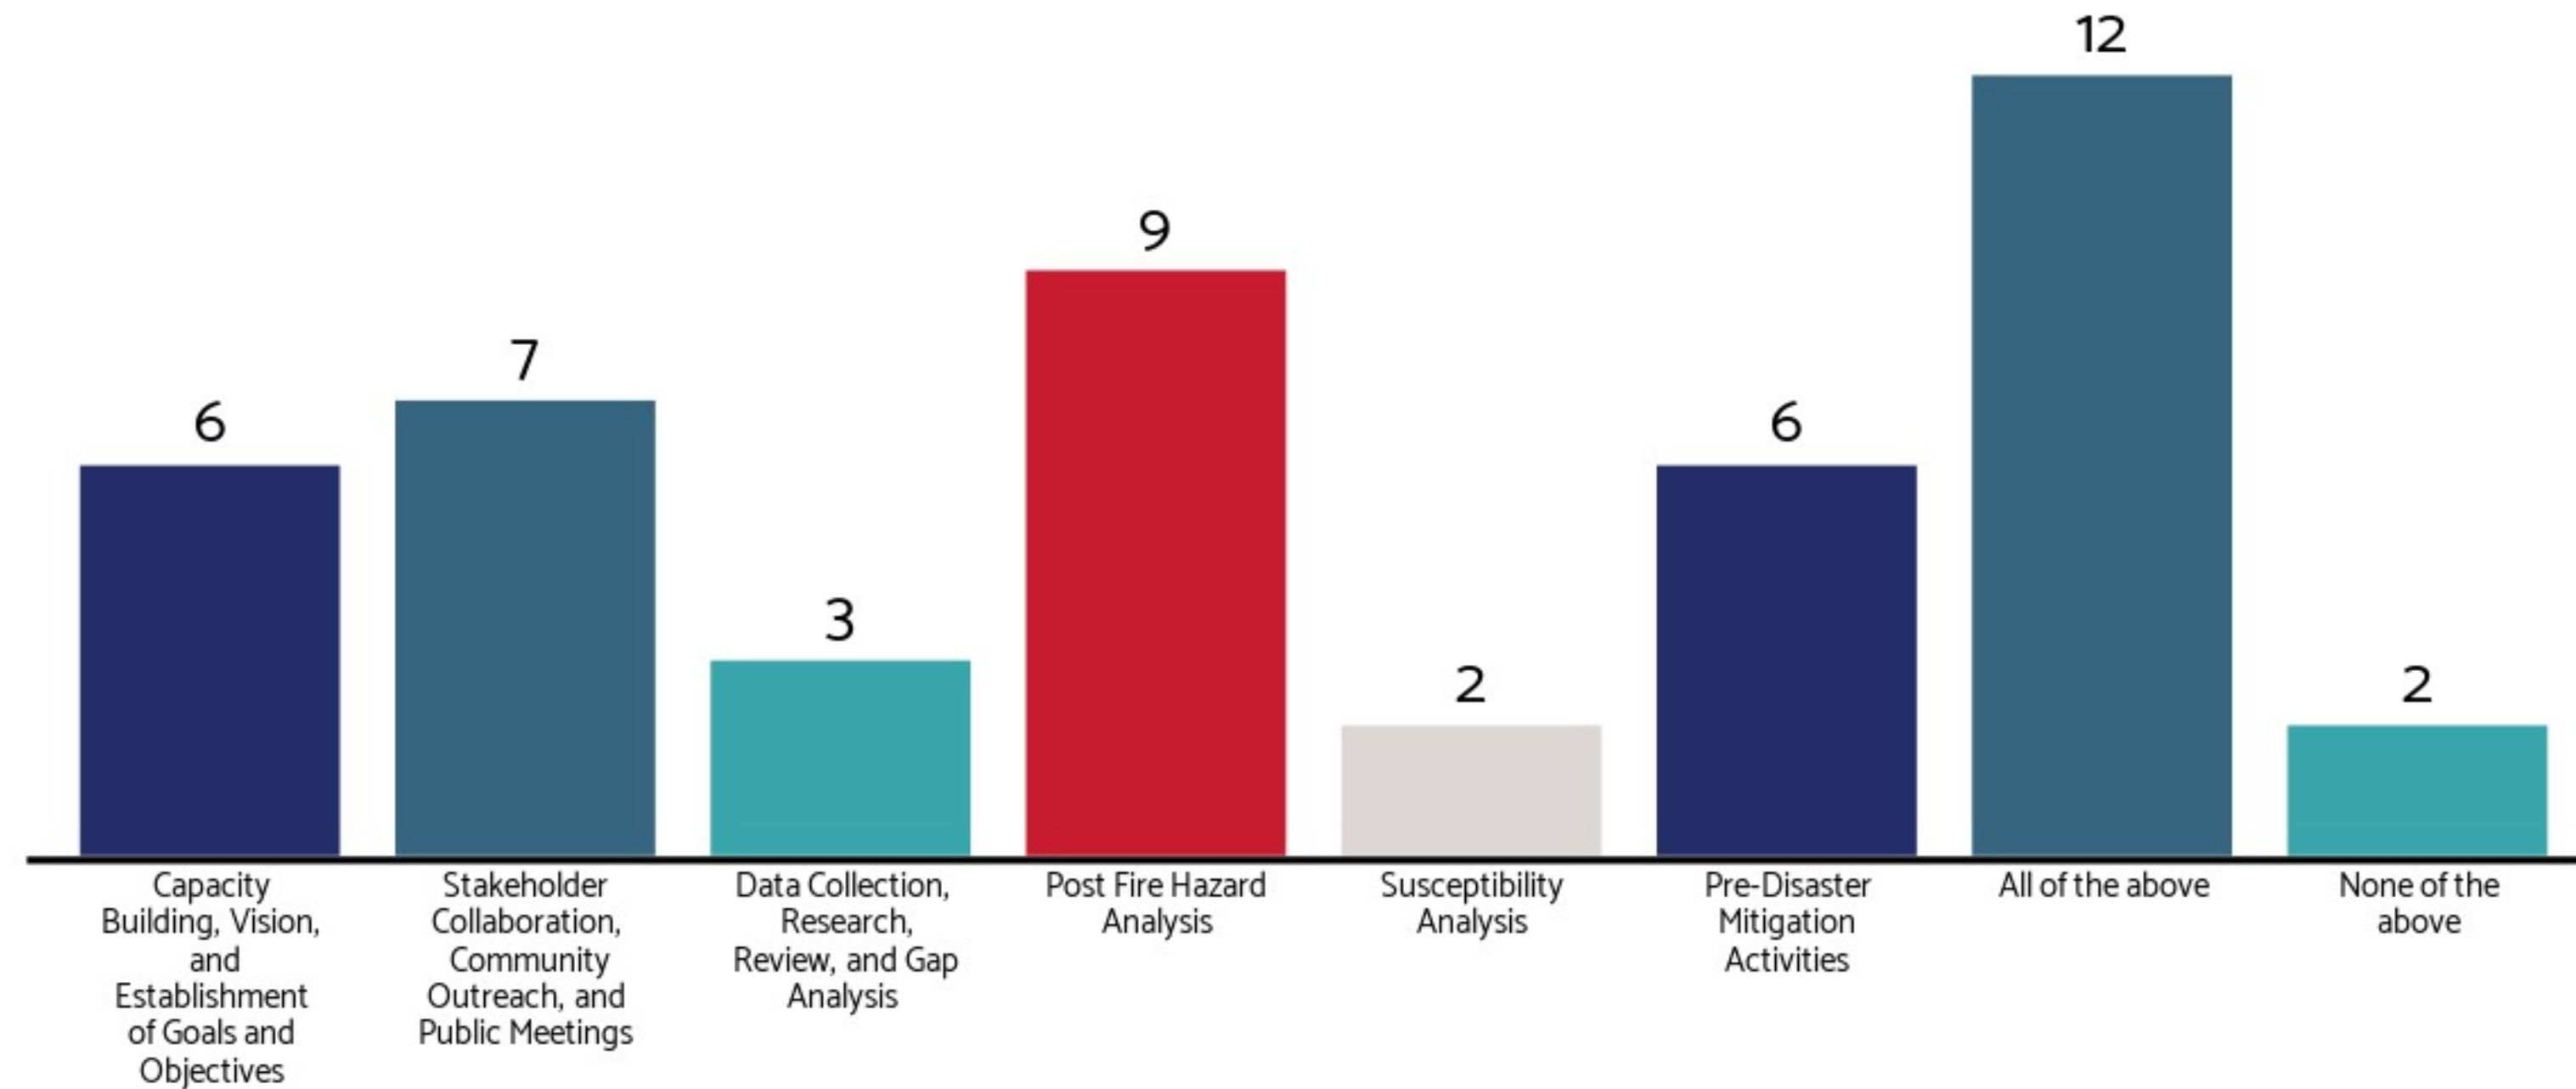

## FRAMEWORK

### Task 6: Pre-Disaster Mitigation Activities

- Development of both a:
  - Pre-Disaster Preparedness Plan (Mitigation projects before a fire)
  - Post-Disaster Preparedness Plan (action plan following a fire)
- Prioritize actions
- Establish roles and responsibilities for mitigation activities
- Determine financial needs
- Permitting requirements

# Which task area best represents your area of expertise or primary interest?

# Wildfire Ready Watersheds

## VALUES AT RISK

## HAZARDS

# Wildfire Ready Watersheds

“No, he’s not busy. ... In fact, that whole thing is just a myth.”

# Wildfire Ready Watersheds

**Healthy Meadow:** Factors of a pristine meadow include: meadow hydrology, soils and vegetation and interdependent; diverse mosaic of habitat with wet meadow and riparian vegetation; surface flow from snowmelt; high water table; inundation during floods with sediment deposition and attenuated flood flows; subsurface flow of snowmelt; and percolation with groundwater recharge.

**Unhealthy Meadow:** Factors of a degraded meadow include: reduced natural storage of water; lowering of groundwater table; flood flows confined to channel with no inundation during floods; disconnect of channel from meadow floodplain; reduced percolation; xeric (or dry) vegetation; incised stream channel with increased sediment transport; and compacted soils.

## MITIGATION

**Protect and Restore Natural Infrastructure**

**Natural buffers that protect communities and assets from wildfires and post fire impacts.**

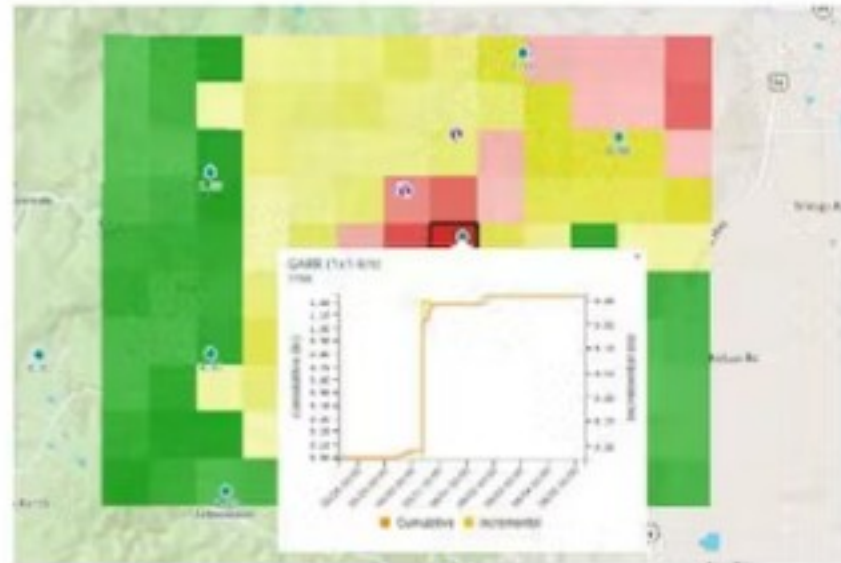

# Wildfire Ready Watersheds

## ALERT SYSTEMS

Today 8:19 PM  
Moderate: Rule "CalWood PreView Alert - 0.50 in/hr" has triggered a notification. 13 of 130 locations are forecast to pass the threshold of 0.5 in/h at 06/25/2021 20:28 MDT.
